DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 3,4,9,10,16 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regard to claims 3,9 and 16, Applicant's use of alternative language (i.e. "or") in line 2 of the claims renders the claims indefinite since the metes and bounds of the claim cannot be readily ascertained; Examiner suggests utilizing language such as - - at least one of - - or - -one of - - as utilized in claim 2.

In regard to claims 4,10 and 17, Applicant's use of alternative language (i.e. "or") in line 2 of the claims renders the claims indefinite since the metes and bounds of the claim cannot be readily ascertained; Examiner suggests utilizing language such as - - at least one of - - or - -one of - - as utilized in claim 2.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Crafts'606 et al.

Art Unit: 3771

The Crafts et al. reference discloses an aviator-type respirator apparatus for helmets/gas masks comprising an electrical/signal component (18,19), a breathing connection (12,13), a breathing gas source 10 and electric connecting means (see inductive connections 21,21'; 35,36 and 22,22' for circuit connections for earphones, microphones and external circuits in Fig. 2).

In regard to claim 2 and 5, the monitoring system and data are voice/audio in nature.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Mejean and Hannah et al. references pertain to other breathing-type devices with associated data connections.
